# KROHNE

ETA Process Instrumentation and Martech Controls have been appointed as the new sales representatives for Krohne in New England and in Upstate New York.

*Founded in 1921, Krohne is a German company with US operations (including some manufacturing and a NIST lab) in Beverly, MA. Krohne has innovative, industry leading solutions for process measurement, including flow, level, temperature, pressure, process analytics. Most products are now shipping in 4-8 weeks.*

### Flow Measurement

*Flowmeters, flow controllers and flow accessories*

- All industrial process applications
- Range from cost-effective mechanical indicators to very advanced flow instrumentation
- Tools for maintenance and service, flow computers and accessories for flow measurement

[Read More](#)

### Level Measurement

*Transmitters, switches, indicators and accessories for level measurement*

- Continuous level and interface measurement or point level detection
- Contact and non-contact measurement of liquids, pastes, granulates, powders, solids and bulk goods
- Either standard or demanding applications with advanced requirements, hazardous areas and Functional Safety (SIL)

[Read More](#)

## Temperature Measurement

*Assemblies, sensors, transmitters and accessories for temperature measurement*

- Resistance temperature detectors (RTD) and thermocouples (TC) for industrial process and OEM applications
- Temperature assemblies, cable probes, compact sensors and tailor-made solutions
- Head and rail mounted temperature transmitters, safe and SIL approved designs

[Read More](#)

## Pressure Measurement

*Process instruments for pressure and differential pressure applications*

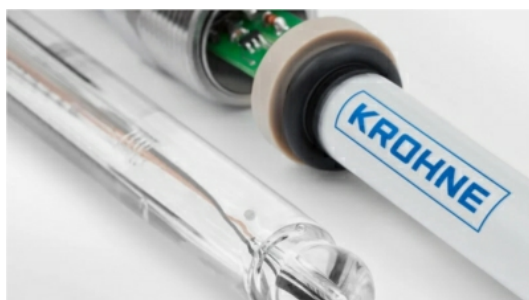

- Comprehensive portfolio: transmitters, primary elements, diaphragm seals and accessories
- Ceramic and metallic measuring cells
- For a wide range of industrial applications with liquids, gases and steam

[Read More](#)

## Process Analytics

*Sensors, systems, assemblies, transmitters and accessories for process analysis*

- Full portfolio for inline and online liquid analytical measurements
- Analytical sensors with and without integrated transmitter or complete measuring systems for all industries
- Installation equipment, signal converters, accessories to fit many requirements

[Read More](#)

## Smart Flow Control

*Smart meter valves for decentralized control tasks without complex DCS-based control loops*

- Autonomous actuators combining valve capabilities, flow, pressure and temperature measurement with unique diagnostics and control functions
- IIoT-ready for use in advanced, autonomous operating factories
- Suitable for greenfield and brownfield projects
