Level Measurement

Transmitters, switches, indicators and accessories for level measurement

- For continuous level and interface measurement or point level detection
- Contact or non-contact measurement of liquids, pastes, granulates, powders, solids, bulk goods etc.
- For standard or demanding applications with advanced requirements, hazardous areas and Functional Safety (SIL)

Titus Continuous Nitrogen Generators

TN2 and TNX Membrane Nitrogen Generators

Titus NGN Nitrogen Generators Pressure Swing Adsorption

• Economic engineered solutions tailored for your

• Pressure swing adsorption (PSA) Nitrogen Generators

- nitrogen needs
- Custom design solution based on flow, purity and budget
- TN2 Series of Nitrogen Generators includes several models

- provide a continuous stream of nitrogen gas for various industrial and commercial uses
- NGN Series PSA Nitrogen Generators provide power, flow rate and purity of nitrogen for every application
- NGN systems are designed to customer specifications, please contact us to discuss your application

Cost-effective, on-demand nitrogen gas production, delivering immense value with versatile applications across numerous industries. Membrane Nitrogen Generators present economical solutions to businesses seeking a reliable source of nitrogen production, leveraging a range of cutting-edge technologies. Pressure Swing Adsorption Generators are ideal for ultra-high purity and/or high volume applications.

New methylene chloride standard, also known as dichloromethane and DCM - ETAPII Blog

April 30, 2024, the U.S. Environmental Protection Agency finalized a ban on most uses of methylene chloride, a dangerous chemical known to cause liver cancer, lung cancer, breast cancer, brain cancer, cancer of the blood, and cancer of the central nervous system, as well as neurotoxicity, liver harm and even death. Uses that will continue under the Workplace Chemical Protection Program are highly industrialized and important to national security and the economy. These are uses for which EPA received data and other information that shows workplace safety measures to fully address the unreasonable risk could be achieved. [Link to READ MORE](#)

iFacility Services Inc. iFacility Services provides competent person fall protection equipment inspections to ANSI Z359.1-1992 standards. Fall protection refers to a system of safeguards and measures designed to prevent or mitigate injuries resulting from falls in workplaces or other environments where there is a risk of falling from an elevated surface. Falls are a significant cause of injuries and fatalities in various industries, including construction, manufacturing, maintenance, and even some office settings. To minimize these risks, fall protection systems are put in place to ensure the safety of workers and individuals working at heights.
