## Memosens® — The Complete Digital Solution

Integrated smart sensor technology – from the sensor to the analyzer:  
Measuring systems with Memosens technology from M4 Knick guarantee  
reliability and performance at the highest level.

# Digital pH, ORP, Conductivity, and Oxygen

## Increase:

- Operator safety
- Sensor life
- Time between sensor calibrations
- Measurement reliability

**Memosens Sensor**

### Easy

- Smart sensor allows for calibration in the shop/lab
- No calibration fluids in the field
- One-step startup with Stratos transmitter

### Durable

- High temperature and pressure ratings

### Comprehensive

- Wide range of pH, ORP, conductivity, and oxygen sensors available

**Retractable Holder**

### Quick

- One-step sensor insertion and retraction

### Safe

- Eliminates projectiles
- Eliminates process exposure
- CIP and SIP compatible

### Adaptive

- Manufactured in a variety of materials, process connections, and insertion lengths

**Memosens Cable**

### Simple

- Quick disconnect at the sensor head

### Rugged

- Inductive, all plastic, connection resistant to moisture and corrosion

### Flexible

- No cable length restrictions
- Junctions and extensions have no impact on signal quality
- No grounding issues

**Analyzer/Transmitter**

### Clear

- Text driven menu
- Multi-colored backlight provides sensor condition from a distance

### Informative

- Sensocheck function provides automatic sensor condition monitoring
- Alarms on failure
- HART/AMS compatible

### Versatile

- One device for pH, ORP, Conductivity, or Dissolved Oxygen
- Works with Memosens or Analog sensors
- 2-wire or 4-wire

**Portavo Portable Meter**

### Easy

- Automatic calibration of pH, ORP, conductivity, and oxygen sensors
- Upload calibration data and sensor performance data to Paraly SW 112 software
- Export to Excel

### Tough

- Built for the lab & the field
- NEMA 4X
- Scratch resistant
- Drop tested

### Informative

- Sensor diagnostics graphically displayed

Off-line Calibration and Sensor Diagnostics
